I build **AI systems that execute real marketing work in production**: research, content, ads, CRM, reporting. They run 24/7 with zero added headcount. Before building the systems, I spent ten years leading SEO and growth teams, from agency accounts to a **1B+ annual-user portfolio**. I don't believe in isolated tactics: I believe in systems that keep producing after their author is gone.

200 → 3,000+ ad creatives/week from an AI ad factory built in-house (Reverse Tech)	0 → 20M organic sessions/mo in 24 months via automated content pipelines (Softonic)	2M/day peak visits on a programmatic system, 100% organic (word.tips)	+40% YoY organic traffic on a 6-site, 1B+ user portfolio (2024 vs 2023)

EXPERIENCE ■

Reverse Tech remote · 2 yrs 6 mo

Jan 2026 – now	Head of AI (Marketing Automation) - Design, ship and operate agentic systems (LLM agents plus workflow orchestration) that execute marketing work end to end: research, content production, CRM and email, reporting and support. - Built an AI ad factory: a closed loop that mines winning creatives, turns them into briefs, routes each asset between humans and the generative engine, and ships to Meta and Google via API. Output went from ~200 to 3,000+ creatives/week (~10x per person) and removed ~€20k/month in external platform costs. - Built human-in-the-loop oversight, evaluation and monitoring so automated output stays reliable and auditable, plus documentation and handover so systems outlive their author.
Apr 2025 – now	Head of Organic Marketing Leading the organic marketing area across SEO, email, social media and affiliates: strategy, multidisciplinary team coordination, and sustainable, measurable growth in traffic and conversion.
Mar 2024 – Apr 2025	Head of SEO · part-time

Cliqpod Barcelona, hybrid · 1 yr 2 mo

Mar 2024 – Apr 2025	Head of SEO - Led organic strategy for word.tips: a programmatic system of thousands of data-generated pages reaching peaks of 2M visits/day (~60M/mo), 100% organic. - Owned architecture for scale (URL structure, interlinking, crawl budget) with per-template performance monitoring to catch regressions early.
---------------------	--

Softonic Barcelona · 5 yrs 3 mo

Jun 2021 – Mar 2024

SEO Manager

- Owned organic strategy for a **6-site portfolio with 1B+ annual users**; managed and mentored a team of three SEO specialists.
- Designed and led the company's most impactful initiative: a **large-scale automated content program** with generation and review pipelines under quality control, growing organic sessions **from 0 to 20M/month in two years** and the catalog from 100k to 1M+ pages. The system kept producing after I left.
- Delivered **+40% YoY organic traffic** (2024 vs 2023).

Jan 2020 – Jun 2021

SEO Product Owner

- Ran SEO as a product, embedded with engineering: backlog, sprints and per-batch metrics.

Jan 2019 – Jan 2020

SEO Specialist

Grupo Planeta Barcelona · 1 yr 7 mo

Jul 2017 – Jan 2019

SEO Manager

- Group-wide organic strategy across brands like casadellibro.com, lonelyplanet.es and planetadelibros.com; coordinated per-division agencies and corporate stakeholders.
- Built the group's internal tooling: **custom scripts and automated dashboards**, a web-migration framework and an agile SEO methodology adopted across divisions.

Agency roles SUMA Thinking Digital · Tesubi · SEO Coaching · 3 yrs

Jun 2014 – Jul 2017

SEO Manager · Project Director · SEO & SEM Specialist

- SEO/SEM strategy and project direction for clients including Gas Natural Fenosa and Kids&Us.

ENGINEERING & SIDE PROJECTS ■

- [Claudegram](#): open-source Telegram bot that bridges messages to Claude Code, with a voice layer (TypeScript, 147★ on GitHub).
- [Unlimited Sheets](#): Google Sheets add-on, built and shipped solo as a live product.
- [google-autocomplete-extractor](#): open-source Node.js scraper working via endpoint interception instead of DOM parsing.
- [seo-scraper](#): open-source Node.js scraper to extract SEO elements from any site at scale.

SKILLS ■

AGENTIC AI

LLM agents & workflow orchestration, prompting strategies, evals & human-in-the-loop review, RAG, content pipelines. Claude & Claude Code as daily drivers.

CODE
